### **3. Unique Mechanisms**

#### **3.1 Instant Trader Rewards**

Whenever a user buys **≥1 USTRIX** from the liquidity pool, they **immediately receive USTC rewards** proportional to their total USTRIX holdings. This is an automated, gas-efficient mechanism built into the token's contract logic.

 *Buy 1 or more USTRIX → Get automatic USTC rewards*

---

#### **3.2 Liquidity Provider Incentives**

Users who add liquidity to the **USTRIX/LUNC pool on Garuda DeFi** are rewarded **automatically in USTC + USTRIX**, with **no need for staking or farming**.

 *Provide liquidity → Start earning immediately*

---

#### **3.3 Dynamic Burn Function**

With every reward distribution:

- **1% of the USTC reward pool is permanently burned**
- This creates a direct deflationary effect on the **USTC supply**, contributing to broader **Terra Classic deflation efforts**

 *Earn while burning USTC—supporting the LUNC ecosystem*

---

## 4. Tokenomics

### 4.1 Transaction Tax (5%) Breakdown:

Allocation	Percentage
Trader Rewards (USTC)	3.5%
LP Rewards	1%
Dev pool	0.5%

---

### 4.2 Supply Control

- **Total Supply:** 5,000 USTRIX
- **Minting:** Permanently disabled

USTRIX's rarity ensures that its value is governed by scarcity and active demand from traders and liquidity providers.

---

## 5. Use Cases

- Long-term holders benefit from ongoing pool activity

### ✓ For Ecosystem Supporters:
